

Name:

The Steps of Art Criticism: In each step of art criticism, you are answering a different question. The four steps of art criticism are:

1. **Description:** What do I see?
2. **Analysis:** How is the work organized?
3. **Interpretation:** What is the artist trying to communicate?
4. **Judgment:** Is this a successful work of art?

Analysis: Look again at the painting. How is the work arranged? Break down the painting into its composition, or the way the art principles are used to organize the art elements.
